

MGIC SAM Cash Flow Analysis Worksheet

Complete Field Extraction Requirements

Background

In the mortgage underwriting process, IRS forms and schedules are used to determine a borrower's stable qualifying income and financial obligations.

Core Personal Tax Documents

- Form 1040 (U.S. Individual Income Tax Return): The foundational document used to report all annual personal income, deductions, and credits.
- Form W-2 (Wage and Tax Statement): Reports an employee's annual wages and the taxes withheld by their employer.
- Form 1098 (Mortgage Interest Statement): Reports the amount of mortgage interest, points, and property taxes paid by a borrower during the year.
- Form 1099-NEC (Nonemployee Compensation): Reports income paid to independent contractors and freelancers.
- Form 1099-R (Distributions From Pensions, IRAs, etc.): Reports money taken out of retirement accounts, annuities, or pensions.

Supporting Schedules (Detail Pages for Form 1040)

- Schedule 1 (1040): Lists additional income sources not on the main 1040, such as unemployment, prize money, or gambling winnings.
- Schedule A (1040): Itemizes allowable personal deductions against income, such as medical expenses or state and local taxes.
- Schedule B (1040): Reports interest and ordinary dividend income, required if the total exceeds \$1,500.
- Schedule C (1040): Reports the profit or loss specifically for unincorporated businesses owned as a Sole Proprietorship.
- Schedule D (1040): Reports capital gains and losses from the sale of assets like stocks or real estate.
- Schedule E (1040): Reports supplemental income from rental real estate, royalties, partnerships, and S-corporations.
- Schedule F (1040): Reports profit or loss specifically from farming activities.

- Schedule SE (1040): Calculates the self-employment tax due on net earnings from a business.

Business Entity Tax Returns

- Form 1065 (U.S. Partnership Return of Income): Used by businesses with multiple partners to report earnings; income "flows through" to owners via K-1s.
- Form 1120-S (U.S. Income Tax Return for an S Corporation): Reports income, losses, and dividends for S-corporation shareholders.
- Form 1120 (U.S. Corporation Income Tax Return): Reports income and expenses for C-corporations, which are taxed separately from their owners.
- Schedule K-1 (1065 or 1120-S): A personalized form issued to each partner or shareholder showing their specific portion of the business's profits and losses.

Verification and Calculation Forms

- Form 4506-C (Request for Transcript of Tax Return): Allows a lender to pull an official transcript directly from the IRS to verify a borrower's provided tax data.
- Form 4562 (Depreciation and Amortization): Details non-cash expenses that underwriters often "add back" to a borrower's net income to increase qualifying power.
- Form 1084 (Self-Employment Income Cash Flow Analysis): A worksheet used by underwriters to adjust tax return numbers according to secondary market rules (e.g., Fannie Mae).

Mapping: Business Structures to IRS Forms & Schedules

Business Structure	Primary Tax Form	Applicable Schedules	Purpose for Underwriting
Sole Proprietorship	Form 1040 (Personal)	Schedule C	Reports all business profit/loss directly on the personal return.
Rental Property Owner	Form 1040 (Personal)	Schedule E	Reports supplemental income from individual rental real estate.
S-Corporation	Form 1120-S (Business)	Schedule K-1	"Passes through" profit/loss from the business to the owner's 1040.
Partnership / LLC	Form 1065 (Business)	Schedule K-1	Reports the individual partner's share of business earnings.

Implementation Logic for Self-Employed Borrowers

1. Personal Return Components (Form 1040)

If the borrower is a Sole Proprietor or owns Rental Properties in their own name, these schedules are physically embedded within the personal 1040 tax package.

- Schedule C: Utilized for "Gig" workers or small business owners who have not legally incorporated. It provides the net profit/loss figure for the business.
- Schedule E: Utilized for real estate investors. Underwriters use this specific schedule to calculate "Net Rental Income" and determine if a property is cash-flowing.

2. Business Entity Components (Form 1120-S or 1065)

If the borrower operates through a formal entity (S-Corp, Partnership, or multi-member LLC), the primary financial data lives on the business return, but the Schedule K-1 acts as the mandatory bridge to the borrower's personal liability.

- Schedule K-1 (Form 1120-S): Located within the S-Corp return. It identifies the borrower's specific ownership percentage and their individual share of the company's annual profit or loss.
- Schedule K-1 (Form 1065): Located within the Partnership return. Underwriters use this to verify that the income share reported on the personal 1040 Schedule E (Part II) matches the actual business records.

Data Extraction Per MGIC Sheet

SCHEDULE B - INTEREST AND DIVIDENDS FROM SELF-EMPLOYMENT

Row	MGIC Field Name	Tax Form Source
1	Recurring Interest Income	LINE 1 or 1040 LINE 2b
2	Recurring Dividend Income	LINE 5 or 1040 LINE 3b

SCHEDULE C - SOLE PROPRIETORSHIP

Row	MGIC Field Name	MGIC Line #	Azure Box #	Azure Field Name
-	Business Name	Header	Header	BusinessName
4	Net Profit (Loss)	Line 31	Box 31	NetProfitOrLoss
5	Deduct nonrecurring income	Line 6	Box 6	OtherIncome
6	Depletion	Line 12	Box 12	Depletion
7	Depreciation	Line 13	Box 13	Depreciation
8	Non-Deductible Meals and Entertainment	Line 24b	Box 24b	MealsAndEntertainment
9	Business Use of Home	Line 30	Box 30	ExpensesForHomeUse

SCHEDULE C - SINGLE-MEMBER LLC

Azure: Doctype: tax.us.1040ScheduleC.2023

Row	MGIC Field Name	Tax Form Source	Box Num
-	Business Name	Schedule C Header	
3	W-2 Income from Self-Employment	W-2, Box 5 (in general)	Box 1
4-12	Same as Schedule C Sole Proprietorship	See Schedule C table above	

SCHEDULE D - CAPITAL GAINS AND LOSSES

Row	MGIC Field Name	Tax Form Source	Box Num
13	Recurring Capital Gains (Loss)	page 2, LINE 16 (details on FORM 8949)	16

SCHEDULE E - SUPPLEMENTAL INCOME AND LOSS

Row	MGIC Field Name	Tax Form Source	Box Num
14	Royalty Income (Loss)	Schedule E LINE 4	Box 4, Each Property Column

15	Total Expenses	Schedule E LINE 20	Box 20, Each Property
16	Depreciation Expense or Depletion	Schedule E LINE 18	Box 18, Each Property

SCHEDULE F - FARM INCOME

Row	MGIC Field Name	Tax Form Source	Box Num
17	Net Profit (Loss)	Schedule F LINE 34	Box 34
18	Non-Tax Portion Ongoing Co-op & CCC Pmts	LINES 3a minus b through 6a minus b	Box 3a – Box 3b through 6
19	Add nonrecurring loss	Schedule F LINE 2-8	Box 2, 8
20	Deduct nonrecurring income	Schedule F LINE 2-8	
21	Depreciation	Schedule F LINE 14	Box 14
22	Amortization/Casualty Loss/Depletion (only if noted)	Schedule F LINE 32	Box 32a, 32b,32c,32d,32e,32f
23	Business Use of Home (only if noted)	Schedule F LINE 32	

PARTNERSHIP CASH FLOW

Row	MGIC Field Name	Tax Form Source	Box Num
-	Partnership Name	Schedule K-1 Header	Box B
SCHEDULE K-1			
24	Ordinary Income (Loss)	Schedule K-1 LINE 1 (If > Distributions see additional requirements)	Box 1
25	Net Rental Income (Loss)	Schedule K-1 LINES 2 & 3 (If > Distributions see additional requirements)	Box 2, 3
26	Guaranteed Payments	Schedule K-1 LINE 4c	Box 4c
FORM W-2			
27	Wages	W-2, Box 5 (in general)	TBD
FORM 1065			

28	Passthrough (Income) Loss from Other Partnerships	Form 1065 LINE 4	Box 4
29	Deduct nonrecurring income	Form 1065 LINES 5, 6 & 7	Box 5, 6,7
30	Depreciation	Form 1065 LINE 16c	Box 16c
31	Depreciation (FORM 8825)	Form 8825 LINE 14	Box 14 for each Property
32	Depletion	Form 1065 LINE 17, Page 1	Box 17
33	Amortization/Casualty Loss/Nonrecurring Loss	from statement or LINES 5,6 & 7	TBD
34	Mortgages or Notes Payable in Less Than 1 Year	Schedule L, LINE 16, Column d	Link
35	Non-Deductible Travel and Entertainment Exclusion	Schedule M-1, LINE 4b	Box 4b. Link
36	Multiplied by Ownership Percentage	Schedule K-1 Ownership %	TBD
-	Partner's Total Share of Income (Loss)	Calculated Field	

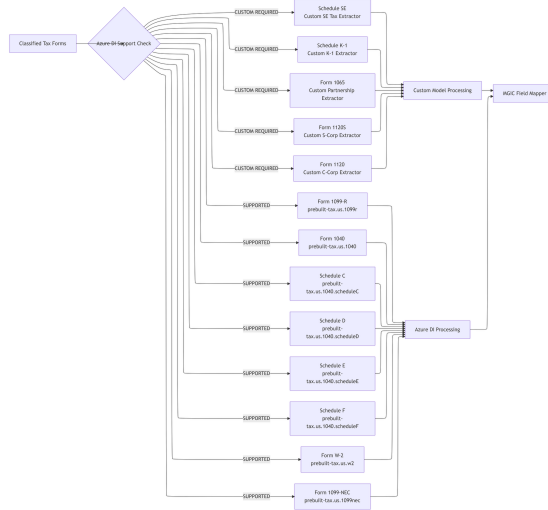

S CORPORATION CASH FLOW

Row	MGIC Field Name	Tax Form Source	Box Num
-	S Corporation Name	Schedule K-1 Header	Box B
SCHEDULE K-1			
37	Ordinary Income (Loss)	Schedule K-1 LINE 1 (If > Distributions see additional requirements)	Box 1. Link
38	Net Rental Income (Loss)	Schedule K-1 LINES 2 & 3 (If > Distributions see additional requirements)	Box 2, 3

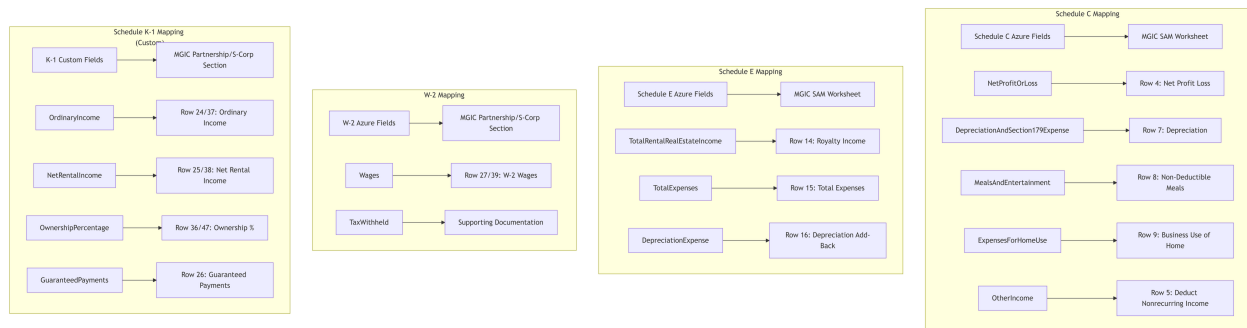

FORM W-2			
39	Wages	W-2, Box 5 (in general)	TBD
FORM 1120S			
40	Deduct nonrecurring income	Form 1120S LINES 4 & 5	Box 4,5
41	Depreciation	Form 1120S LINE 14	Box 14
42	Depreciation (FORM 8825)	Form 1120S LINE 14	Box 14 for each property
43	Depletion	Form 1120S LINE 15	Box 15. Link
44	Amortization/Casualty Loss/Nonrecurring Loss	from statement or LINES 4 & 5	Box 4,5
45	Mortgages or Notes Payable in Less Than 1 Year	Schedule L, LINE 17, Column d	Box 17 for each property. Link
46	Non-Deductible Travel and Entertainment Exclusion	Schedule M-1, LINE 3b	Bix 3b. Link
47	Multiplied by Ownership Percentage	Schedule K-1 Ownership %	TBD
-	Shareholder's Total Share of Income (Loss)	Calculated Field	

ADDITIONAL REQUIREMENTS

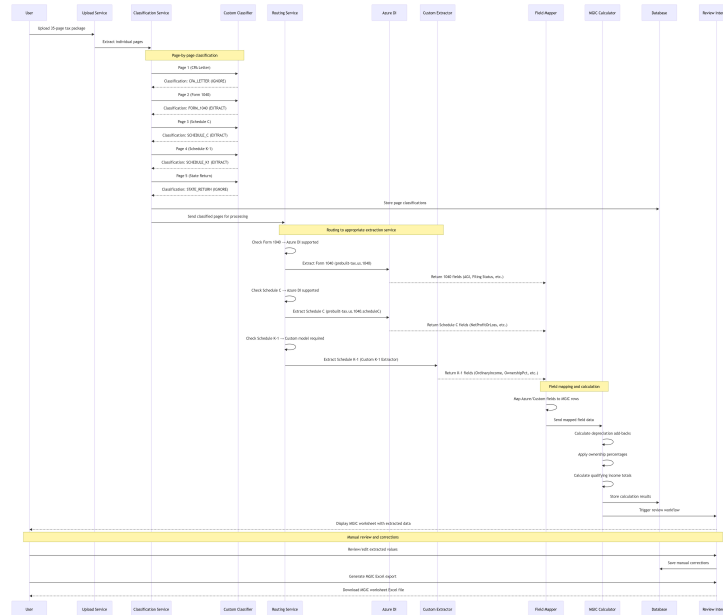

Requirement	Details
Multiple Entity Names	Worksheet supports multiple businesses per entity type (multiple Schedule C, multiple partnerships, multiple S-Corps)
Two-Year Comparison	All fields require data entry for two consecutive tax years for trend analysis
Subtotal Calculations	Each section (Schedule B, C, D, E, F, Partnership, S-Corp) has auto-calculated subtotals
Mileage Depreciation Rates	System must apply correct IRS annual rates: 2025: \$0.33, 2024: \$0.30, 2023: \$0.28 per mile
Ownership Percentage Application	Partnership and S-Corp income must be multiplied by borrower's ownership percentage from K-1

This section shows the mapping of the data extracted to the MGIC sheet

The following sequence diagram shows the end-to-end processing flow

Azure Document Intelligence Test Results and MGIC Field Mapping

Source of Schema of [Tax Forms supported by Azure:](#)

4.1 Azure DI Coverage (95% of MGIC Requirements)

Schedule B - Interest and Dividends (MGIC Rows 1-2):

- Azure Model: tax.us.1040ScheduleB.2023 (98% confidence)
- Box1: Interest Income Array → MGIC Row 1
- Box5: Dividend Income Array → MGIC Row 2
- Status: ☒ SUPPORTED

Schedule C - Sole Proprietorship (MGIC Rows 4-12):

- Azure Model: tax.us.1040ScheduleC.2023 (87% confidence)
- Box31: Net Profit/Loss → MGIC Row 4
- Box13: Depreciation → MGIC Row 7 (add-back)
- Box24b: Meals & Entertainment → MGIC Row 8 (50% add-back)
- Box30: Home Office → MGIC Row 9 (100% add-back)
- Status: ☒ SUPPORTED

Schedule D - Capital Gains (MGIC Row 13):

- Azure Model: tax.us.1040ScheduleD.2022 (87% confidence)
- Box7: Net Short-term Gains/Loss
- Box16: Net Long-term Gains/Loss → MGIC Row 13
- Status:  SUPPORTED

Schedule E - Rental Income (MGIC Rows 14-16):

- Azure Model: tax.us.1040ScheduleE.2023 (87% confidence)
- Box3: Rental Income → MGIC Row 14
- Box20: Total Expenses → MGIC Row 15
- Box18: Depreciation → MGIC Row 16 (add-back)
- Multi-property support confirmed
- Status:  SUPPORTED

Custom Models Required (5% of MGIC Requirements)

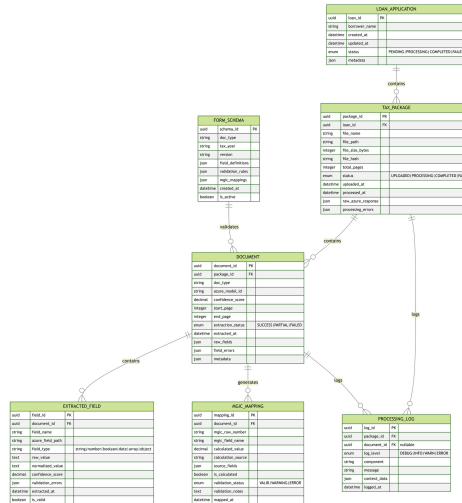

Partnership Cash Flow (MGIC Rows 24-36):

- Schedule K-1 (Form 1065):  NOT SUPPORTED
- Form 1065:  NOT SUPPORTED
- Status: Custom model required

S-Corporation Cash Flow (MGIC Rows 37-47):

- Schedule K-1 (Form 1120S):  NOT SUPPORTED
- Form 1120S:  NOT SUPPORTED
- Status: Custom model required

Data Model for storing Extracted Data

Core Tables

1. LOAN_APPLICATION

Primary container for each loan processing request.

- Tracks overall loan status
- Links to borrower information
- Metadata field for extensibility

2. TAX_PACKAGE

Represents uploaded tax document package (PDF/multi-page).

- Stores Azure DI raw response for reprocessing
- Tracks file metadata and processing status
- Error tracking for failed uploads

3. DOCUMENT

Individual tax forms are identified within package.

- Maps to Azure DI document detection results
- Stores confidence scores and page ranges
- Flexible doc_type field handles new forms

4. EXTRACTED_FIELD

Individual data points extracted from each document.

- Stores both raw Azure values and normalized values
- Confidence scoring per field
- Validation error tracking

5. MGIC_MAPPING

MGIC worksheet calculations derived from extracted fields.

- Links calculations back to source data
- Supports complex multi-field calculations
- Validation status tracking

Flexibility Features

1. Schema Evolution Support

FORM_SCHEMA Table:

sql

-- Handles different tax years and form versions

```
CREATE TABLE form_schema (  
  schema_id UUID PRIMARY KEY,  
  doc_type VARCHAR(50), -- 'tax.us.1040ScheduleC.2023'  
  tax_year VARCHAR(4), -- '2023', '2024'  
  version VARCHAR(10), -- 'v1.0', 'v2.1'  
  field_definitions JSONB, -- Schema definition  
  validation_rules JSONB, -- Field validation rules  
  mgic_mappings JSONB, -- MGIC row mappings  
  created_at TIMESTAMPTZ,  
  is_active BOOLEAN  
);
```

Example field_definitions:

json

```
{  
  "Box31": {  
    "type": "number",  
    "description": "Net profit or loss",  
    "mgic_row": "4",  
    "required": true,  
    "validation": {"min": -999999, "max": 999999}  
  },  
  "BoxA": {
```

```

        "type": "string",
        "description": "Principal business activity",
        "required": false,
        "max_length": 100
    }
}

```

2. Failed Extraction Handling

Graceful Degradation:

- EXTRACTED_FIELD.raw_value stores original Azure response
- EXTRACTED_FIELD.normalized_value stores cleaned/validated data
- field_errors JSON tracks specific validation failures
- extraction_status enum allows partial success tracking

Example error tracking:

json

```

{
  "field_errors": {
    "Box31": "Low confidence: 0.45, manual review required",
    "BoxA": "Extraction failed: text unclear"
  },
  "processing_errors": {
    "classification": "Document type uncertain: 0.67 confidence",
    "pages": "Page 3 orientation correction failed"
  }
}

```

3. Multi-Year Tax Form Support

Dynamic Field Mapping:

sql

-- Query for current year schema

```

SELECT * FROM form_schema
WHERE doc_type = 'tax.us.1040ScheduleC.2024'
AND is_active = true;

```

-- Fallback to previous year if current unavailable

```

SELECT * FROM form_schema
WHERE doc_type LIKE 'tax.us.1040ScheduleC.%'
ORDER BY tax_year DESC LIMIT 1;

```

4. Extensible JSON Storage

Key JSON Fields:

- `raw_azure_response`: Complete Azure DI output for reprocessing
- `metadata`: Extensible properties (processing time, model version, etc.)
- `source_fields`: MGIC calculation audit trail
- `context_data`: Debugging information

Database Schema

Main tables

```
CREATE TABLE loan_application (  
  loan_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),  
  borrower_name VARCHAR(200) NOT NULL,  
  created_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  updated_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  status VARCHAR(20) DEFAULT 'PENDING',  
  metadata JSONB DEFAULT '{} '::jsonb  
);  
  
CREATE TABLE tax_package (  
  package_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),  
  loan_id UUID REFERENCES loan_application(loan_id),  
  file_name VARCHAR(255) NOT NULL,  
  file_path TEXT NOT NULL,  
  file_size_bytes INTEGER,  
  file_hash VARCHAR(64),  
  total_pages INTEGER,  
  status VARCHAR(20) DEFAULT 'UPLOADED',  
  uploaded_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  processed_at TIMESTAMP,  
  raw_azure_response JSONB,  
  processing_errors JSONB DEFAULT '{} '::jsonb  
);  
  
CREATE TABLE document (  
  document_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),  
  package_id UUID REFERENCES tax_package(package_id),  
  doc_type VARCHAR(100) NOT NULL,  
  azure_model_id VARCHAR(50),  
  confidence_score DECIMAL(4,3),  
  start_page INTEGER,  
  end_page INTEGER,  
  extraction_status VARCHAR(20) DEFAULT 'SUCCESS',  
  extracted_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP,  
  raw_fields JSONB DEFAULT '{} '::jsonb,  
  field_errors JSONB DEFAULT '{} '::jsonb,  
  metadata JSONB DEFAULT '{} '::jsonb  
);
```

```

CREATE TABLE extracted_field (
  field_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
  document_id UUID REFERENCES document(document_id),
  field_name VARCHAR(100) NOT NULL,
  azure_field_path VARCHAR(200),
  field_type VARCHAR(20) DEFAULT 'string',
  raw_value TEXT,
  normalized_value TEXT,
  confidence_score DECIMAL(4,3),
  validation_errors JSONB DEFAULT '{}'::jsonb,
  extracted_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP,
  is_valid BOOLEAN DEFAULT true
);

CREATE TABLE mgic_mapping (
  mapping_id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
  document_id UUID REFERENCES document(document_id),
  mgic_row_number VARCHAR(10) NOT NULL,
  mgic_field_name VARCHAR(100) NOT NULL,
  calculated_value DECIMAL(15,2),
  calculation_source TEXT,
  source_fields JSONB DEFAULT '[]'::jsonb,
  is_calculated BOOLEAN DEFAULT false,
  validation_status VARCHAR(20) DEFAULT 'VALID',
  validation_notes TEXT,
  mapped_at TIMESTAMP DEFAULT CURRENT_TIMESTAMP
);

```

Indexes

```

CREATE INDEX idx_tax_package_loan_id ON tax_package(loan_id);
CREATE INDEX idx_document_package_id ON document(package_id);
CREATE INDEX idx_document_type ON document(doc_type);
CREATE INDEX idx_extracted_field_document_id ON extracted_field(document_id);
CREATE INDEX idx_mgic_mapping_document_id ON mgic_mapping(document_id);
CREATE INDEX idx_mgic_mapping_row ON mgic_mapping(mgic_row_number);

```

Usage Examples

1. Store Azure DI Response

Insert tax package with raw Azure response

```

INSERT INTO tax_package (loan_id, file_name, raw_azure_response)
VALUES (
  '123e4567-e89b-12d3-a456-426614174000',
  'tax_return_2023.pdf',
  '{"modelId": "prebuilt-tax.us", "documents": [...]}'::jsonb
);

```

2. Query MGIC Worksheet Data

Get all MGIC row 4 values (Schedule C net profit) for a loan

```
SELECT
    d.doc_type,
    m.calculated_value,
    m.source_fields,
    m.validation_status
FROM mgic_mapping m
JOIN document d ON m.document_id = d.document_id
JOIN tax_package tp ON d.package_id = tp.package_id
WHERE tp.loan_id = '123e4567-e89b-12d3-a456-426614174000'
AND m.mgic_row_number = '4';
```

3. Handle Failed Extractions

Find documents with extraction issues

```
SELECT
    tp.file_name,
    d.doc_type,
    d.confidence_score,
    d.extraction_status,
    d.field_errors
FROM document d
JOIN tax_package tp ON d.package_id = tp.package_id
WHERE d.extraction_status != 'SUCCESS'
OR d.confidence_score < 0.70;
```

Custom Form Classifier Specification

Classification Labels

The classifier identifies specific form types:

Azure DI Supported Forms:

- form_1040
- schedule_a, schedule_b, schedule_c, schedule_d, schedule_e, schedule_f, schedule_se
- schedule_1, schedule_2
- form_w2
- form_1099_nec, form_1099_r, form_1099_misc, form_1099_div, form_1099_int, form_1099_k
- form_1098, form_1098_e, form_1098_t
- form_4562

Business Entity Forms:

- schedule_k1_partnership (Form 1065)

- schedule_k1_scorp (Form 1120S)
- form_1065
- form_1120s
- form_1120

Other:

- state_return
- cpa_letter
- unknown

Training Data Strategy

Container Structure:

/training-data/

```

├─ form_1040/ (5-10 samples)
├─ schedule_a/ (5-10 samples)
├─ schedule_b/ (5-10 samples)
├─ schedule_c/ (5-10 samples)
├─ schedule_d/ (5-10 samples)
├─ schedule_e/ (5-10 samples)
├─ schedule_f/ (5-10 samples)
├─ schedule_se/ (5-10 samples)
├─ schedule_1/ (5-10 samples)
├─ schedule_2/ (5-10 samples)
├─ form_w2/ (5-10 samples)
├─ form_1099_nec/ (5-10 samples)
├─ form_1099_r/ (5-10 samples)
├─ form_1099_misc/ (5-10 samples)
├─ form_1098/ (5-10 samples)
├─ form_4562/ (5-10 samples)

```

└─ schedule_k1_partnership/ (5-10 samples)

└─ schedule_k1_scorp/ (5-10 samples)

└─ form_1065/ (5-10 samples)

└─ form_1120s/ (5-10 samples)

└─ form_1120/ (5-10 samples)

└─ state_return/ (5-10 samples)

└─ cpa_letter/ (5-10 samples)

└─ unknown/ (5-10 samples)

Total: 500-700 samples across all form types

Implementation

- Leverage existing model training code with minor tweaks
- Multi-class classification (23+ labels)
- Confidence threshold for unknown classification

Required Custom Extractors

Separate custom extractors needed for each business form:

1. K-1 Partnership Extractor (schedule_k1_partnership)
2. K-1 S-Corp Extractor (schedule_k1_scorp)
3. Form 1065 Extractor (form_1065)
4. Form 1120S Extractor (form_1120s) – Including Schedule L Assets and Liabilities
5. Form 1120 Extractor (form_1120) - Including Schedule L Assets and Liabilities

Tax Document Processing API

1. Create Tax Calculation Request

POST /api/v1/tax-calculations

Content-Type: application/json

```
{  
  "borrower_name": "John Smith",
```

```
"loan_id": "loan_12345",
"tax_year": "2023"
}
```

201 Created

```
{
  "calculation_id": "calc_uuid",
  "borrower_name": "John Smith",
  "loan_id": "loan_12345",
  "status": "CREATED",
  "created_at": "2024-01-15T10:00:00Z"
}
```

2. Upload Tax Documents

POST /api/v1/tax-calculations/calc_uuid/upload

Content-Type: multipart/form-data

```
{
  "file": [binary PDF data],
  "file_name": "tax_return_2023.pdf"
}
```

200 OK

```
{
  "package_id": "pkg_uuid",
  "calculation_id": "calc_uuid",
  "status": "PROCESSING",
  "file_name": "tax_return_2023.pdf",
  "total_pages": 25,
  "uploaded_at": "2024-01-15T10:30:00Z"
}
```

3. Check Processing Status

GET /api/v1/tax-calculations/calc_uuid/status

200 OK

```
{
  "calculation_id": "calc_uuid",
```

```
"status": "COMPLETED",
"processing": {
  "classification": "COMPLETED",
  "extraction": "COMPLETED",
  "mgic_mapping": "COMPLETED"
},
"documents_found": {
  "form_1040": 1,
  "schedule_c": 2,
  "schedule_e": 1,
  "schedule_k1": 1
},
"completion_time": "2024-01-15T10:34:22Z"
}
```

4. Get Extracted Data for Review

GET /api/v1/tax-calculations/calc_uuid/data

200 OK

```
{
  "calculation_id": "calc_uuid",
  "mgic_worksheet": {
    "schedule_c": [
      {
        "mgic_row": "4",
        "field_name": "Net Profit (Loss)",
        "extracted_value": 85000,
        "confidence": 0.94,
        "source_document": "Schedule C - Business 1",
        "source_field": "Box31",
        "page_number": 3,
        "editable": true
      }
    ],
    "schedule_e": [
      {
        "mgic_row": "14",
```

```

        "field_name": "Rental Income",
        "extracted_value": 24000,
        "confidence": 0.89,
        "source_document": "Schedule E - Property 1",
        "source_field": "Box3",
        "page_number": 8,
        "editable": true
    }
]
},
"documents": [
    {
        "document_id": "doc_uuid",
        "doc_type": "schedule_c",
        "pages": "3-4",
        "confidence": 0.94,
        "view_url": "/api/v1/documents/doc_uuid/view"
    }
]
}

```

5. Update Extracted Values (User Edits)

PUT /api/v1/tax-calculations/calc_uuid/data

Content-Type: application/json

```

{
    "updates": [
        {
            "mgic_row": "4",
            "field_name": "Net Profit (Loss)",
            "new_value": 87500,
            "reason": "Corrected from source document review"
        }
    ]
}

```

200 OK

```
{
  "updated_fields": 1,
  "recalculated_totals": true
}
```

6. Download MGIC Spreadsheet

GET /api/v1/tax-calculations/calc_uuid/export?format=xlsx

200 OK

Content-Type: application/vnd.openxmlformats-officedocument.spreadsheetml.sheet

Content-Disposition: attachment; filename="MGIC_Worksheet_John_Smith_2023.xlsx"

[Binary Excel file with completed MGIC worksheet]

7. View Source Document Pages

GET /api/v1/documents/doc_uuid/view?page=3

200 OK

Content-Type: image/png

[PNG image of tax document page with highlighted extracted fields]

Status Values

- CREATED - Request created, ready for upload
- PROCESSING - Background classification/extraction running
- COMPLETED - Ready for user review
- REVIEWED - User completed verification
- EXPORTED - MGIC spreadsheet downloaded
